

## Sponsors Needed

Building, marketing, and traveling costs for a FIRST robotics team are substantial. Corporate sponsorship is essential in order for teams to raise the funds to cover costs that are normally within the six digit range.

» The Thunderchickens are an IRS 501(c)3 organization. This means that all our received donations are tax deductible.

» Your company will receive local and nation-wide publicity with some of the largest names in the business.

» Your company will help students learn about the real world of science and technology, opening up the doors of opportunity to many different scholarship and future employment.

We are proud to introduce to you the cutting edge of the high school student:

## Thunderchickens Robotics

First Robotics Team 217

501 (c) 3  
organization

# For the Inspiration and Recognition of Science and Technology

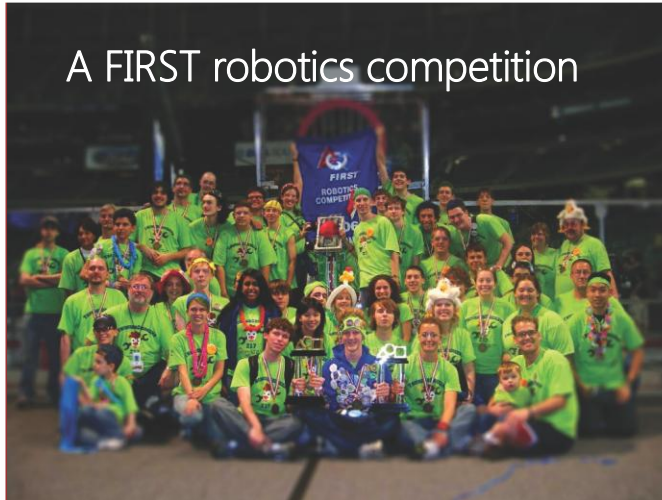

## FIRST

A high school robotics competition, where students have six weeks to design, build, program, perfect, and ship a robot to compete, both locally and nationally, in an athletic type event.

## FIRST

Real world exposure in engineering, machining, marketing and communications. Students are mentored by engineers and other business professionals, gaining unparalleled hands-on experience.

### A FIRST robotics competition

A FIRST robotics competition is similar to other sporting events where, rather than athletic skills, it requires skills in engineering, electronics, computers, strategy, teamwork, and marketing. Students compete with over 2000 teams across the nation for awards and scholarships. The national competition is televised on ESPN.
